

# Arithmetic questions

ANSWERS	
Addition with Formal Written Methods	Back to Basics
1.) 687	5.) 358
2.) 7,898	6.) 9,528
3.) 1,498	7.) 3,632
4.) 9,809	8.) 1,058

Year 5 | Autumn term | Block 1 – Place value | Step 1

T-Roman numerals to 1,000

L-To know Roman numerals to 1000

## Recall

- 1) Write the number 6 in Roman numerals. **VI**
- 2) Write the number 19 in Roman numerals. **XIX**
- 3) Write XCV in words. **Ninety-five**
- 4) Complete the part-whole model.

## L-To know Roman numerals to 1000

### Hook:

Roman numerals  
are based on  
seven symbols.

I = 1  
V = 5  
L = 50

X = 10  
C = 100

D = 500

M = 1000

How do we write  
all multiples of 100  
less than 1000?

### *Key Questions:*

*What patterns can you see in the Roman number system?*

*What rules do we use when converting numbers to Roman numerals?*

*What letters are used in the Roman number system?*

*What does each letter represent?*

*What is the same and what is different about representing the number "five hundred and three" in the Roman number system and in our number system?*

## L-To know Roman numerals to 1000

Let's Learn:

What letters are used in the Roman number system?

What does each letter represent?

I = 1

V = 5

X = 10

L = 50

C = 100

D = 500

M = 1,000

## L-To know Roman numerals to 1000

### Let's Learn:

Here is a date written in Roman numerals.

XXI / IX / MMXV

What day of the month is shown?

XXI means  $10 + 10 + 1 = 21$

What month is shown? September

IX means 1 before 10  $10 - 1 = 9$

What year is shown?

MMXV means  $1,000 + 1,000 + 10 + 5 = 2,015$

21<sup>st</sup> September 2015

L-To know Roman numerals to 1000

Let's Learn:

C M L X X X means 980

CM means  
100 before 1,000  
 $1,000 - 100 = 900$

LXXX means  
 $50 + 10 + 10 + 10 = 80$

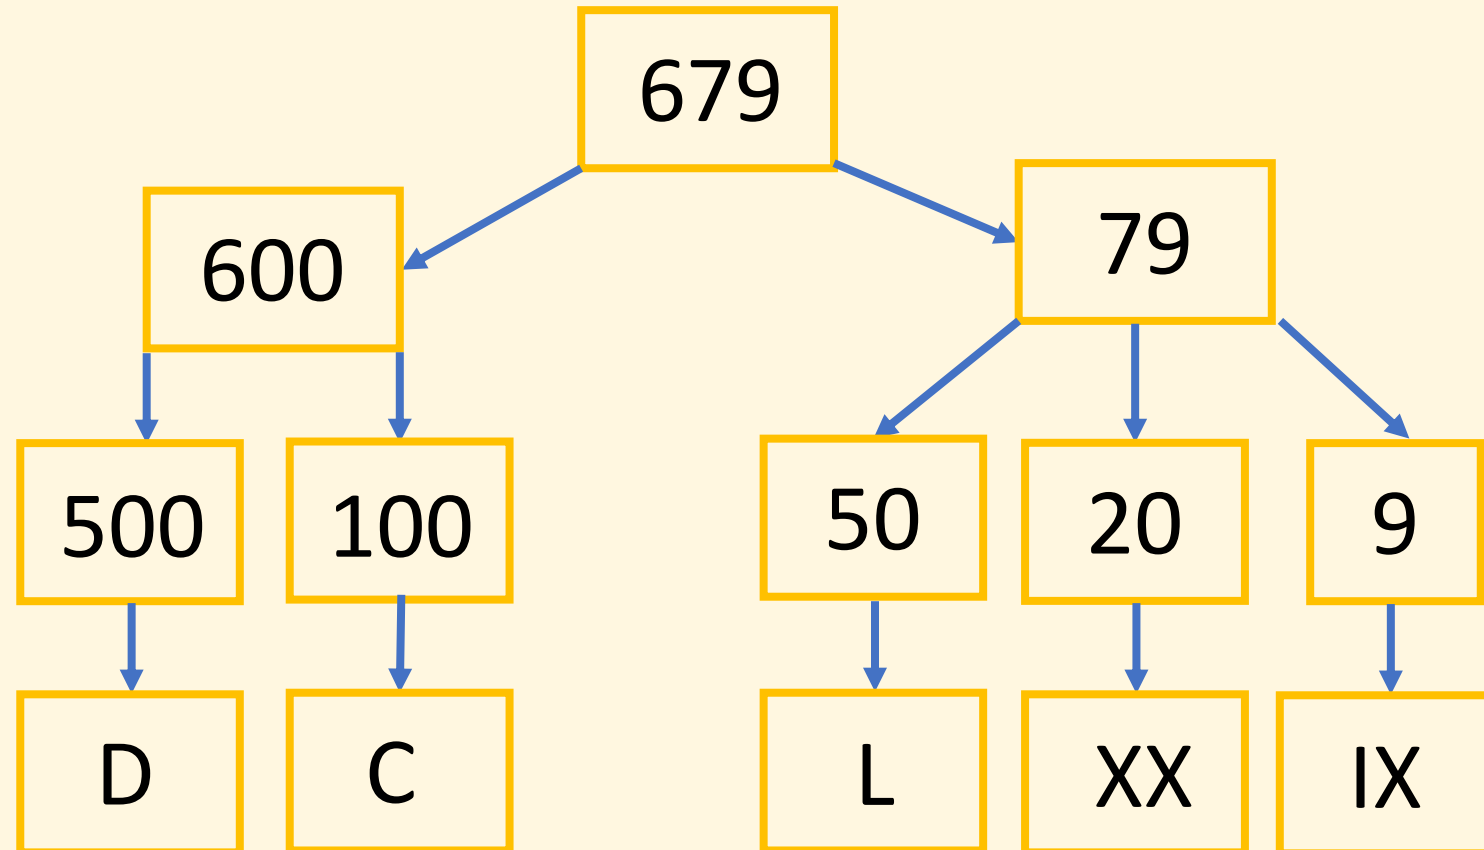

974 in Roman numerals is CMLXXIV

CM LXX IV

L-To know Roman numerals to 1000

Let's Learn:

679 in Roman numerals is DC L XX IX

## L-To know Roman numerals to 1000

### Let's Learn:

What is CD in numerals?

CD means 400

CD means 600

Eva

$500 + 100 = 600$   
which is DC in  
Roman numerals.

Who is correct? Amir

What mistake has the other person made?

CD means 100 before 500

$500 - 100 = 400$

## L-To know Roman numerals to 1000

### Let's Have a Go:

1 Write these numbers in Roman numerals.

(a) 27

(b) 427

2 It is believed that the Pantheon in Rome was constructed in the year 125.

Write the year 125 in Roman numerals.

3

What number is CLXVIII?

*Key Questions:  
What rules do we use when converting numbers to Roman numerals?  
How do you know what order to write the letters when using Roman numerals?*

# L-To know Roman numerals to 1000

## Independent Practice:

1 Complete the tables.

10	<b>20</b>	30	40	50	60	<b>70</b>	80	90	100
X	XX	<b>XXX</b>	XL	L	<b>LX</b>	LXX	<b>LXXX</b>	<b>XC</b>	C

100	200	300	400	<b>500</b>	600	700	<b>800</b>	900	1,000
<b>C</b>	<b>CC</b>	CCC	<b>CD</b>	D	DC	<b>DCC</b>	DCCC	<b>CM</b>	M

2 Complete the table.

Numerals	Words	Roman numerals
52	<b>fifty-two</b>	<b>LII</b>
<b>635</b>	six hundred and thirty-five	<b>DCXXXV</b>
<b>991</b>	<b>nine hundred and ninety-one</b>	CMXCI
<b>407</b>	four hundred and seven	<b>CDVII</b>
<b>839</b>	<b>eight hundred and thirty-nine</b>	DCCCXXXIX

3 Dora and Amir are writing 520 in Roman numerals.

- a) Amir  
 b) Dora has written VC directly from 'five hundred', i.e. V = 5 and C = 100  
 However, five hundred has its own Roman numeral, D

a) Who is correct?

b) What mistake has the other person made?

- a) XV, XXV, XXXV, XL  
 b) CC, CCCL, CD, CDL  
 c) XL, L, LXX, LXXX  
 d) VI, XII, XXI, XIV

4 Complete the sequences.

a) V, X, , XX, , XXX, ,

b) C, CL, , CCL, CCC, , ,

c) X, XX, XXX, , , LX, ,

d) III, , IX, , XV, XVIII, ,

## L-To know Roman numerals to 1000

If you finish:

Solve

$$\text{CCCL} + \text{CL} =$$

How many calculations, using Roman Numerals, can you write to get the same total?

Possible answers:

$$\text{CD} + \text{C}$$

$$\text{M} \div \text{II}$$

$$\text{C} + \text{CC} + \text{CC}$$

$$\text{C} \times \text{V}$$

# Arithmetic questions

<b>ANSWERS</b>	
<b>Addition with Formal Written Methods</b>	<b>Back to Basics</b>
1.) 1,086	5.) 544
2.) 8,709	6.) 21,635
3.) 10,100	7.) 7,532
4.) 9,011	8.) 1,995

Year 5 | Autumn term | Block 1 – Place value | Step 2

*T - Numbers to 10,000*

*L - To be able to read and represent numbers to 10,000.*

1) What number is represented?

2) Draw counters to represent 2,362

Thousands	Hundreds	Tens	Ones
● ●	● ● ●	● ● ● ● ● ●	● ●

3) What number is represented?

Thousands	Hundreds	Tens	Ones
● 1000 ● 1000 ● 1000		● 10 ● 10 ● 10	● 1 ● 1 ● 1

3,033

L-To be able to read and represent numbers to 10,000.

## Hook

3

6

4

8

### Key Questions:

What is the largest number you can make with these digit cards?

What is the smallest number you can make?

What is the smallest odd number you can make?

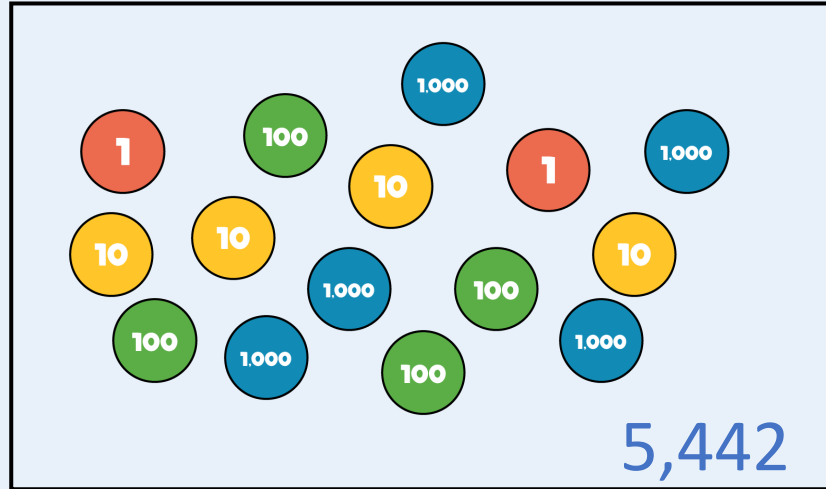

What is the largest even number you can make?

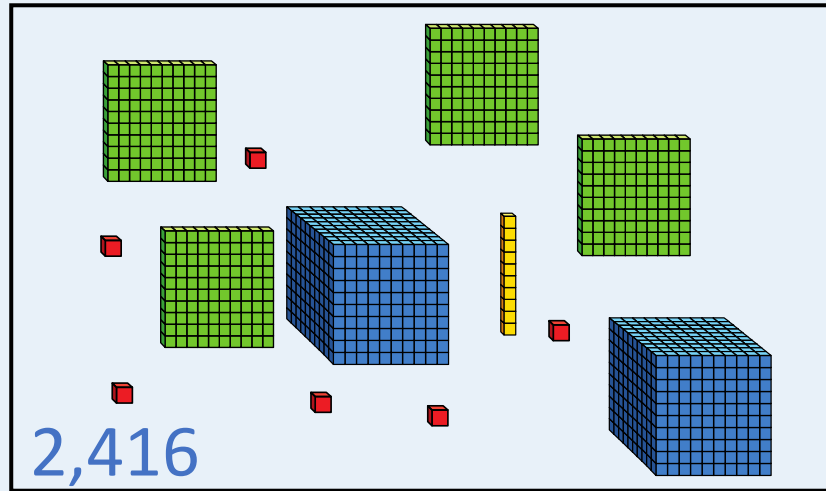

L-To be able to read and represent numbers to 10,000.

Let's Learn:

What numbers are shown?

5,000  
400  
40  
2

2,000  
400  
10  
6

L-To be able to read and represent numbers to 10,000.

## Let's Learn:

# 7653

### Key Questions:

What does each digit represent?

How can we represent this number using concrete resources?

How can you represent this number using pictorial manipulatives?

The value of the \_\_\_\_\_ in \_\_\_\_\_ is \_\_\_\_\_

Th	H	T	O

L-To be able to read and represent numbers to 10,000.

## Let's Have a go:

1 Match the representations to the numbers.

4,005

4,500

4,050

2 Show the number 2,536 in three different ways.

Key Questions:

How have the numbers been represented?

How can you find the odd one out? Explain your reasoning.

What number could the arrow be pointing to?

L-To be able to read and represent numbers to 10,000.

# Independent Practice:

1 What numbers are represented?

c)

TTh	Th	H	T	O

- a) 2,041
- b) 1,204
- c) 4,012

2. Adam says that the number 1,550 is shown below.

Is he correct?

3. Draw counters to show each number.

2,406

Th	H	T	O

5,063

Th	H	T	O

L-To be able to read and represent numbers to 10,000.

# Independent Practice:

4 Complete the table.

Number	1 more	10 more	100 more	1,000 more
3,000				
7,213				
	4,511			
		1,291		
				2,899
			6,059	

Number	1 more	10 more	100 more	1,000 more
3,000	<b>3,001</b>	<b>3,010</b>	<b>3,100</b>	<b>4,000</b>
7,213	<b>7,214</b>	<b>7,223</b>	<b>7,313</b>	<b>8,213</b>
<b>4,510</b>	4,511	<b>4,520</b>	<b>4,610</b>	<b>5,510</b>
<b>1,281</b>	<b>1,282</b>	1,291	<b>1,381</b>	<b>2,281</b>
<b>1,899</b>	<b>1,900</b>	<b>1,909</b>	<b>1,999</b>	2,899
<b>5,959</b>	<b>5,960</b>	<b>5,969</b>	6,059	<b>6,959</b>

5 Complete the part-whole models.

a)

c)

b)

d)

- a) 600, 7 in either order
- b) 4,000
- c) 200, 40, 5 in any order
- d) 6,073

L-To be able to read and represent numbers to 10,000.

If you finish:

Filip has made five numbers using the digits 1, 2, 3 and 4

He is using a letter to represent each digit.

Here are his numbers.

AABCD  
ACDCB  
DCABA  
CDADC  
BDAAB

Use the clues to work out each number.

- The first number in the list is the greatest number.
- The digits in the fourth number add up to 12
- The third number is the smallest number.

44,231

43,132

13,424

31,413

21,442

# Arithmetic questions

ANSWERS	
Addition with Formal Written Methods	Back to Basics
1.) 11,208	5.) 178
2.) 8,476	6.) 41,846
3.) 11,099	7.) 6,967
4.) 34,986	8.) 1,111

# Year 5 | Autumn term | Block 1 – Place value | Step 3

T - *Numbers to 100,000*

L - *To be able to read and represent numbers to 100,000.*

1) Write 5,402 in words.

Five thousand, four hundred and two

2)  $3,485 - 3,000 = 485$

3) What is 10 more than 8,439?  $8,449$

4)  $4,539 + 200 = 4,739$

L-To be able to read and represent numbers to 100,000.

## Hook

Write as many different numbers as you can, using each word no more than once.

You do not need to use all the words each time.

### Key Questions:

Mrs Jones says that you must use all the words each time. Is he correct?

Mrs Higginson says that she can make the number 100,000. Is this true? How do you know?

How can you record your answers?  
Can you think of more than one way?

L-To be able to read and represent numbers to 100,000.

Let's Learn:

36,847

30,000

6,000

800

40

7

TTh	Th	H	T	O
10,000 10,000 10,000	1,000 1,000 1,000	100 100 100 100	10 10	1 1 1 1

Thirty-six thousand, eight hundred and forty-seven

L-To be able to read and represent numbers to 100,000.

Let's Learn:

TTh	Th	H	T	O
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100		1 1
		100 100		1

I'm going to add 3 counters to the tens column.

L-To be able to read and represent numbers to 100,000.

Let's Learn:

TTh	Th	H	T	O
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100	10 10	1 1
		100 100	10	1

$$36,847 + 30 = 36,877$$

L-To be able to read and represent numbers to 100,000.

Let's Learn:

TTh	Th	H	T	O
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100		1 1
		100 100		1

I'm going to add 3 counters to the hundreds column.

Key Questions:  
How many counters can each place value column contain?  
What happens if there are 10 counters or more?

L-To be able to read and represent numbers to 100,000.

Let's Learn:

TTh	Th	H	T	O
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100	10 10	1 1
10,000	1,000 1,000	100 100		1 1
	1,000	100 100		1
		100 100		
		100		

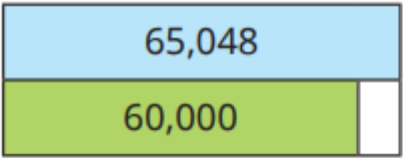

$$36,847 + 300 = 37,147$$

L-To be able to read and represent numbers to 100,000.

Let's Have a go:

Complete the grid to show the number in different ways.

place value counters	part-whole model										
<b>65,048</b>											
	<table border="1" data-bbox="670 836 1141 991"><tr><td>TTh</td><td>Th</td><td>H</td><td>T</td><td>O</td></tr><tr><td></td><td></td><td></td><td></td><td></td></tr></table>	TTh	Th	H	T	O					
TTh	Th	H	T	O							
bar model	place value chart										

Key Questions:  
What does each digit represent?

How can we represent this number using concrete resources?

How can you represent this number using pictorial manipulatives?

The column before/after the \_\_\_\_\_ column is the \_\_\_\_\_ column.

1

number.

- a)  $42,000 = 40,000 + 2,000$
- b)  $17,250 = 10,000 + 7,000 + 200 + 50$
- c)  $20,455 = 20,000 + 400 + 50 + 5$
- d)  $70,090 = 60,000 + 10,000 + 90$
- e)  $50,641 = 40,000 + 10,000 + 300 + 341$

2

Complete the bar models.

3

Complete the number sentences.

- a)  $42,000 = \square + 2,000$
- b)  $17,250 = 10,000 + \square + \square + 50$
- c)  $20,455 = \square + \square + \square + \square$
- d)  $70,090 = \square + 10,000 + \square$
- e)  $50,641 = 40,000 + \square + \square + 341$

L-To be able to read and represent numbers to 100,000.

If you finish:

Here is a number line.

What is the value of A?

B is 100 less than A.

What is the value of B?

C is 1,000 less than B.

Label C on the number line.

A = 38,000

B = 37,900

# Arithmetic questions

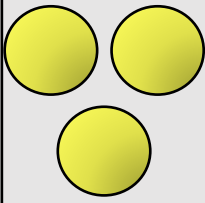

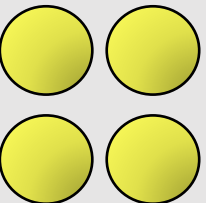

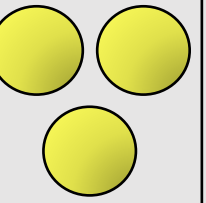

ANSWERS	
Addition with Formal Written Methods	Back to Basics
1.) 11,355	5.) 455
2.) 76,764	6.) 48,996
3.) 39.5	7.) 9,044
4.) 63.5	8.) 2,923

Year 5 | Autumn term | Block 1 – Place value | Step 4

*T – Numbers to 1,000,000*

*L – To be able to read and represent numbers to 1,000,000.*

1) Draw counters to represent 31,043

TTh	Th	H	T	O
				

2) Complete the number sentence.

$$\underline{42,305} = 40,000 + 300 + 2,000 + 5$$

3) What is the value of the digit 2 in 52,301?

Two thousand / 2,000

L-To be able to read and represent numbers to 1 000,000.

## Hook

Here are two ways of partitioning one million into multiples of 100,000

How many other ways can you find to partition one million into multiples of 100,000?

Show your answers as bar models and part-whole models.

Key Questions:

If one million is the whole what could the parts be?

How could place value counters help you partition one million?

Mr Kenny says that he can use his number bonds to 10 to support his working out. Is this true? How does this help?

To be able to read and represent numbers to 1,000,000.

Let's Learn:

What number is shown in the place value chart?

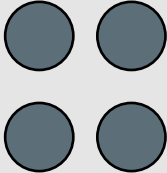

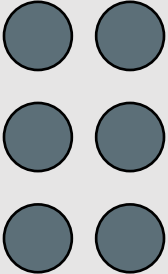

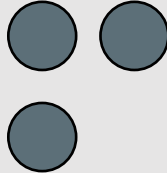

Thousands			Ones		
H	T	O	H	T	O
● ● ● ●		● ● ● ● ● ●	● ● ●	● ●	

To be able to read and represent numbers to 1,000,000.

Let's Learn:

What number is shown in the place value chart?

406,320

400,000	0	6,000	300	20	0
Thousands			Ones		
H	T	O	H	T	O
					
4	0	6	3	2	0

To be able to read and represent numbers to 1,000,000.

Let's Learn:

What number is shown in the place value chart?

406,320

Thousands			Ones		
H	T	O	H	T	O
● ● ● ●	● ● ●	● ● ● ● ● ●	● ● ●	● ●	

What will the number be if you add three counters to the ten-thousands column?

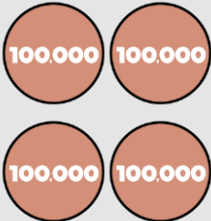

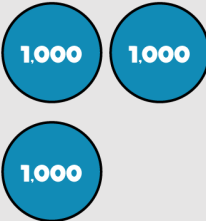

436,320

To be able to read and represent numbers to 1,000,000.

Let's Learn:

The number is 43,210

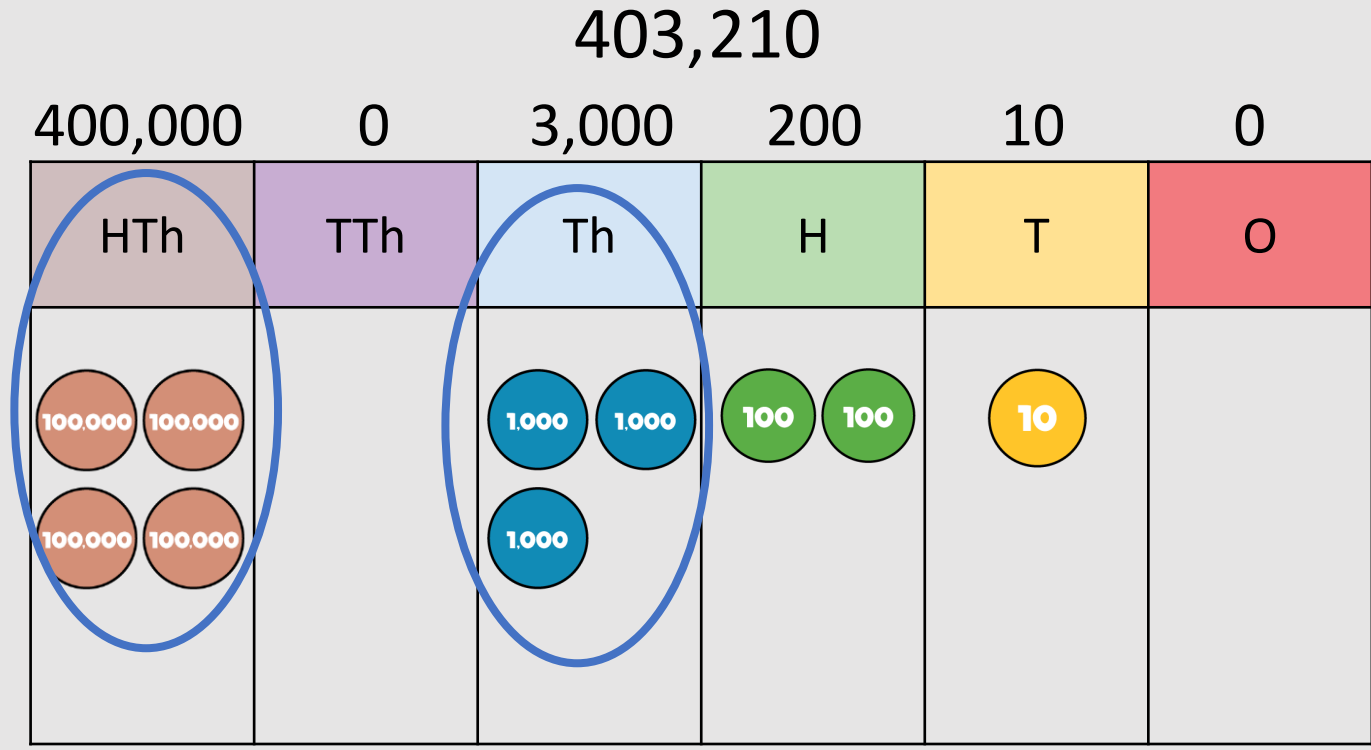

HTh	TTh	Th	H	T	O
					

What mistake has Tiny made?

To be able to read and represent numbers to 1,000,000.

Let's Learn:

Tiny did not include 0 as a place holder in the ten thousand column.

To be able to read and represent numbers to 1,000,000.

## Let's Have a go:

What number is shown in each place value chart?

Give your answers in numerals.

HTh	TTh	Th	H	T	O
					

Thousands			Ones		
H	T	O	H	T	O
					

What is the same and what is different about these place value charts?

### Key Questions:

How have the numbers been represented?

What other models could you use?

The value of the \_\_\_\_\_ in \_\_\_\_\_ is \_\_\_\_\_

# Independent Practice:

1 What numbers are represented in the place value charts?

2 Make these numbers in a place value chart.

- a) 104,379      b) 804,363      c) 92,715      d) 690,018

What is the same about all the numbers you have made?

4

- a) 1 counter in the hundred-thousands column, 4 counters in the thousands column, 7 counters in the hundreds column, 7 counters in the tens column and 9 counters in the ones column
  - b) 8 counters in the hundred-thousands column, 4 counters in the thousands column, 6 counters in the hundreds column, 6 counters in the tens column and 3 counters in the ones column
  - c) 9 counters in the ten-thousands column, 2 counters in the thousands column, 7 counters in the hundreds column, 1 counter in the tens column and 5 counters in the ones column
  - d) 6 counters in the hundred-thousands column, 9 counters in the ten-thousands column, 1 counter in the tens column and 8 counters in the ones column
- multiple possible answers, e.g.:  
 They all have a digit total of 24  
 They are all less than a million.  
 They are all greater than 90,000

5

- a) 295      2,095      19,216      200,000
- b) three numbers with 2 in the hundreds column, e.g. 1,250      10,299      999,299

6

- a) 300 (3 hundreds)
- b) 300 (3 hundreds)
- c) 3 (3 ones)
- d) 300,000 (3 hundred-thousands)
- e) 30,000 (3 ten-thousands)
- f) 3,000 (3 thousands)

To be able to read and represent numbers to 1,000,000.

If you finish:

a) Circle all the numbers that have 2 in the hundreds column.

295

2,095

19,216

200,000

b) Write three more numbers that have 2 in the hundreds column.  
Each number should have a different number of digits.

Dora is thinking of a 6-digit number.

- It is an odd number.
- The smallest digit has the greatest value.
- The greatest digit has the smallest value.
- The first and last digits add up to 10
- The first three digits also add up to 10
- The last three digits add up to 20
- The two middle digits are the same.

What could Dora's number be?

possible solutions:

127,749

136,659

145,569

154,479

163,389

Use the following markings.

a) 295 2,095 19,216 200,000

b) three numbers with 2 in the hundreds column, e.g. 1,250 10,299 999,299

# Arithmetic questions

ANSWERS	
Addition with Formal Written Methods	Back to Basics
1.) 10,996	5.) 434
2.) 62.3	6.) 17,442
3.) 77.56	7.) 14,220
4.) 22.47	8.) 3,983

Year 5 | Autumn term | Block 1 – Place value | Step 5

*T-Read and write numbers to 1,000,000*

*L-To be able to read and write numbers to 1,000,000.*

1) Draw counters to represent 131,002

HTh	TTh	Th	H	T	O
●	● ● ●	●			● ●

2) How many thousands are there in 68,282?

Sixty-eight / 68

3) What is the value of the digit 3 in 452,392?

3 hundred / 300

4) Write one million in numerals. 1,000,000

L-To be able to read and write numbers to 1,000,000.

## Hook

Use the digit cards and the place value chart to make different 6-digit numbers.

HTh	TTh	Th	H	T	O

### Key Questions:

How many alternative ways can you record your answer?

Mr Latham says that he can write his answer using words. What would this look like?

L-To be able to read and write numbers to 1,000,000.

Let's Learn:

Write the number represented in numerals.

125, ~~30~~4

Thousands			Ones		
H	T	O	H	T	O
●	● ●	● ● ● ● ●		● ● ●	● ● ● ●

Write the number represented in words.

One hundred and twenty-five thousand  
and thirty-four.

L-To be able to read and write numbers to 1,000,000.

Let's Learn:

Complete the part-whole model and write the number in words.

How does the part-whole model help you write the number?  
Four hundred and eighty-one thousand, three hundred and eighty-four.

L-To be able to read and write numbers to 1,000,000.

Let's Learn:

Scott is using a part-whole model to help write the number 145,362 in words.

One hundred and forty-five thousand, three hundred and sixty-two.

What mistake has Scott made?

L-To be able to read and write numbers to 1,000,000.

Let's Have a go:

1

56,402 is shown in the place value chart.

Thousands			Ones		
H	T	O	H	T	O
	● ● ● ● ●	● ● ● ● ● ●	● ● ● ●		● ●

Write the number 56,402 in words.

How does the place value chart help you?

2

A number is made up of 2 ten-thousands, 5 thousands and 7 ones.

Show the number on a place value chart.

Write the number in words and numerals.

# L-To be able to read and write numbers to 1,000,000.

## Independent Practice:

- a) 124,361
- b) 405,984
- c) 450,904

1 What number is represented?

352,146

three hundred and fifty-two thousand, one hundred and forty-six

Write your answer in numerals.

Write your answer in words.

2 Write the numbers in words.

- a) 436,634
- b) 463,643
- c) 207,845

- a) four hundred and thirty-six thousand, six hundred and thirty-four
- b) four hundred and sixty-three thousand, six hundred and forty-three
- c) two hundred and seven thousand, eight hundred and forty-five

3 Write the numbers in numerals.

- a) one hundred and twenty-four thousand, three hundred and sixty-one
- b) four hundred and five thousand, nine hundred and eighty-four
- c) four hundred and fifty thousand, nine hundred and four

4 a) Eva has written the number 231,405 in words.

231,405

a) The part-whole model shows the number before the comma and the number after the comma when the number is written in words. The number has been partitioned into the thousands part and the ones part which helps to write the number.

How does the part-whole model help Eva?

L-To be able to read and write numbers to 1,000,000.

If you finish:

I'm thinking of  
a 6-digit number. The sum  
of the digits is 2

Find all the possible numbers Tiny could be thinking of.

Give your answers in words and numerals.

Investigate with different digit sums.

What do you notice?

200,000  
two hundred  
thousand  
110,000  
one hundred and  
ten thousand  
101,000  
one hundred and  
one thousand  
100,100  
one hundred  
thousand,  
one hundred  
100,010  
one hundred  
thousand and ten  
100,001  
one hundred  
thousand and one

# Arithmetic questions

ANSWERS	
Subtraction with Formal Written Methods	Back to Basics
1.) 326	5.) 855
2.) 1,240	6.) 9,894
3.) 283	7.) 8,064
4.) 2,603	8.) 3,239

Year 5 | Autumn term | Block 1 – Place value | Step 6

T- Powers of 10

L-To be able to explore the relationship between numbers in different columns.

1) Represent the number 513 on the chart.

2) Represent the number 5,130 on the chart.

3) Represent the number 51,300 on the chart.

4) What do you notice? Same number of counters  
Moved 1 column to the left

L-To be able to explore the relationship between numbers in different columns..

Hook:

My answer  
is 620,000

Whitney

What could Whitney's question be?

Mr Kenny says that he thinks Whitney has multiplied 620 by 1000. Is he correct? How do you know?

Mr Smith says he used a Gattegno chart to help him work out a solution. How could this help? What patterns can you see in the Gattegno chart?

If you move a digit one place to the left in a place value chart, how many times greater is the value of the digit?

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

# How many ones are there in 10?

How many tens are there in 100?

There are 10 tens in 1 hundred.

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

How many hundreds are there in 1,000?

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

There are 10 ones in 1 ten.

There are 10 tens in 1 hundred.

There are 10 hundreds in 1 thousand.

HTh	TTh	Th	H	T	O

What do you notice?  
How many tens are there in 1 hundred-thousand? 10

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

There are 10 ones in 1 ten.

There are 10 tens in 1 hundred.

There are 10 hundreds in 1 thousand.

How many tens are there in 200?    20

10 tens

10 tens

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

There are 10 ones in 1 ten.

There are 10 tens in 1 hundred.

There are 10 hundreds in 1 thousand.

How many hundreds are there in 2,000? 20

10 hundreds

10 hundreds

*L-To be able to explore the relationship between numbers in different columns..*

Let's Learn:

There are 10 ones in 1 ten.

There are 10 tens in 1 hundred.

There are 10 hundreds in 1 thousand.

How many hundreds are there in 5,000?

There are 10 hundreds in 1,000 and 5 thousands in 5,000

This means there are 50 hundreds in 5,000

L-To be able to explore the relationship between numbers in different columns..

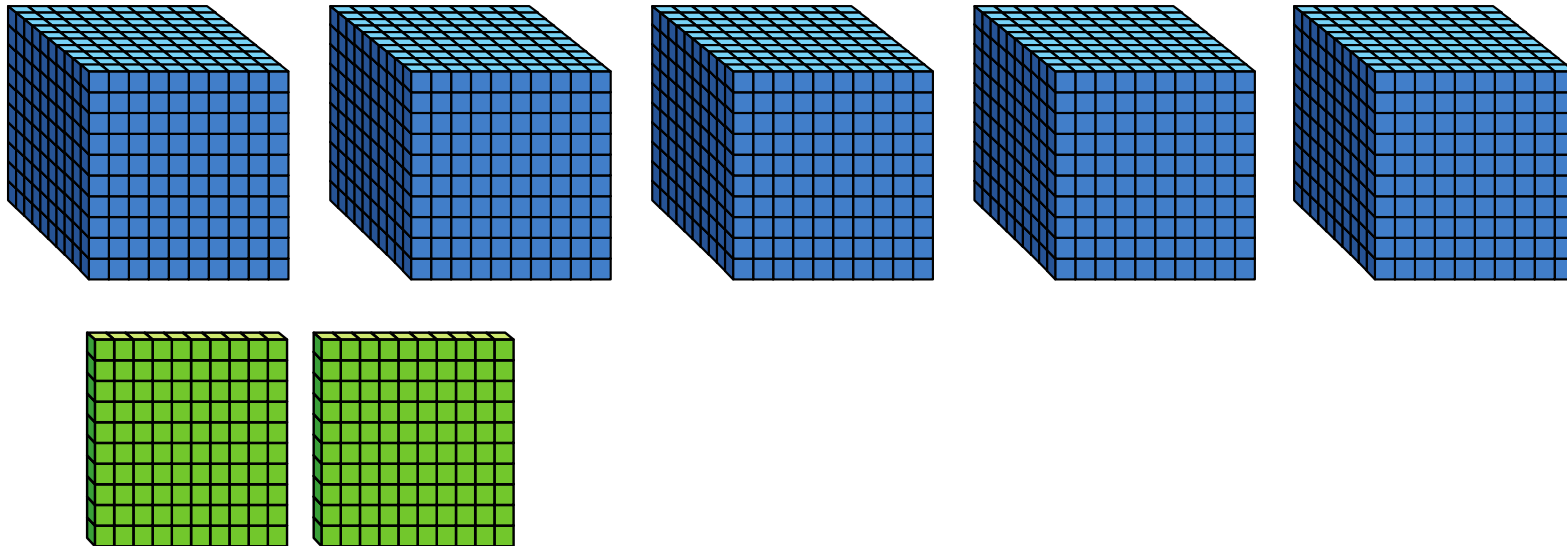

Let's Learn:

There are 10 ones in 1 ten.

There are 10 tens in 1 hundred.

There are 10 hundreds in 1 thousand.

How many hundreds are there in 5,200? 52

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

What number is 10 times the size of 3?

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

What number is 10 times the size of 6?

What do you notice?

If the counter moves up 1 row then the number is 10 times the size.

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

What number is 100 times the size of 6?

What do you notice?

If the counter moves up 2 rows then the number is 100 times the size.

L-To be able to explore the relationship between numbers in different columns..

Let's Learn:

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

To find the number 1,000 times the size,  
the counter will move 3 rows up

\_\_\_\_\_.

L-To be able to explore the relationship between numbers in different columns..

Let's Have a Go:

1 Make the number 425 on a place value chart.

Thousands			Ones		
H	T	O	H	T	O

Now make the number 4,250

What is the same and what is different?

2 What number is shown on the Gattegno chart?

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

Use the chart to find the number 100 times the size of the number shown.

Use the chart to make the number one-tenth the size of the number shown.

There are \_\_\_\_\_ hundreds in 1,000 and \_\_\_\_\_ thousands in \_\_\_\_\_.

This means there are \_\_\_\_\_ hundreds in \_\_\_\_\_.

To be able to explore the relationship between numbers in different columns..

Independent Practice:

Question Answer

1

a)

HTh	TTh	Th	H	T	O
			●●	●●	●●

b)

HTh	TTh	Th	H	T	O
		●●	●●	●●	

c)

HTh	TTh	Th	H	T	O
	●●	●●	●●		

The pattern of counters in the columns is the same.  
In each part, the counters are one column to the left of the previous part.

2

a) 10  
b) 10  
c) 10  
d) 10  
All the answers are 10

3

a) 20  
b) 40  
c) 43  
d) 47

4

a)

100,000	200,000	300,000	400,000	50,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

b) 58,000 is 10 times the size of 5,800  
5,800 is 10 times the size of 580  
580 is 10 times the size of 58  
5,800 is one-tenth the size of 58,000  
58,000 is one-tenth the size of 580,000

many hundreds are there in 2,000?

many hundreds are there in 4,000?

many hundreds are there in 4,300?

5 The Gattegno chart shows the numbers 270,000 and 2,700

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
---------	---------	---------	---------	---------	---------	---------	---------	---------

Question Answer

5

a)

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

b) 270,000 is 100 times the size of 2,700  
27 is one-hundredth the size of 2,700

6

a) 400 cm  
b) 40,000 cm  
c) 400,000 cm  
d) 440,000 cm

l is  times the size of 580

is 10 times the size of 58

l is one-tenth the size of

l0 is one-tenth the size of

a) How many centimetres are there in 4 m?  cm

b) How many centimetres are there in 400 m?  cm

c) How many centimetres are there in 4,000 m?  cm

d) How many centimetres are there in 4,400 m?  cm

L-To be able to explore the relationship between numbers in different columns..

If you finish:

The children choose one of these number cards each.

29,000

290

2,900

290,000

Tommy

My number is ten times the size of Annie's.

Whitney

Dexter's number is one-tenth the size of my number.

Annie

My number has two hundreds.

Dexter

My number is one hundred times the size of Annie's.

Which number does each child have?

Tommy 2,900

Whitney 290,000

Annie 290

Dexter 29,000

# Arithmetic questions

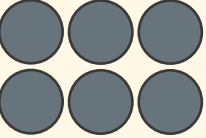

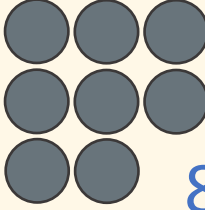

ANSWERS	
Subtraction with Formal Written Methods	Back to Basics
1.) 494	5.) 732
2.) 291	6.) 30,684
3.) 3,880	7.) 13,163
4.) 1,901	8.) 2,199

Year 5 | Autumn term | Block 1 – Place value | Step 7

*T - 10/100/1,000/10,000/100,000 more or less*

*L - To be able to make and identify patterns in numbers.*

1) What number is represented? 312,368

Thousands			Ones		
H	T	O	H	T	O
					
3	1	2	3	6	8

2) What number is represented? 174,308

100,000	200,000	300,000	400,000	500,000	600,000	700,000	800,000	900,000
10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000

10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

L-To be able to make and identify patterns in numbers.

## Hook

Arrange the 5 numbers to make a number pattern.

### Key Questions:

How can you arrange these numbers?

Do they make a pattern?

Can you spot a pattern?

What number comes next?

How can you be sure?

L-To be able to make and identify patterns in numbers.

## Let's Learn:

1

25 160 , 28 160 , 31 160 , 34 160 , 37 160

Add 3 thousand to get the next number.

Each number is 3 thousand more than the number before it. What number comes after 37 160 in this number pattern?

I wonder what the tenth number is.

Look at the thousands.  
25  
28  
31  
34  
37  
[ ]

The next number is [ ] .

2

25 160 , 65 160 , 105 160 , 145 160 , ...

What is the next number in this number pattern?

Add 40 thousand to get the next number.

Each number is 4 ten thousands more than the number before it.

Look at the ten thousands.  
2 } 4  
6 } 4  
10 } 4  
14 } 4  
[ ]

Look at the thousands.  
25 } 40  
65 } 40  
105 } 40  
145 } 40  
[ ]

### Key Questions:

What other patterns can you make?  
Can you come up with a rule for the patterns?

To be able to make and identify patterns in numbers.

Let's Learn:

Complete the counting sequence.

10 more

430	440	450	460	470	480	490	500
-----	-----	-----	-----	-----	-----	-----	-----

432	442	452	462	472	482	492	502
-----	-----	-----	-----	-----	-----	-----	-----

3,432	3,442	3,452	3,462	3,472	3,482	3,492	3,502
-------	-------	-------	-------	-------	-------	-------	-------

What do you notice?

To be able to make and identify patterns in numbers.

Let's Learn:

Complete the counting sequence.

Do you agree with Tiny?

To be able to make and identify patterns in numbers.

Let's Learn:

Complete the counting sequence.

100 less

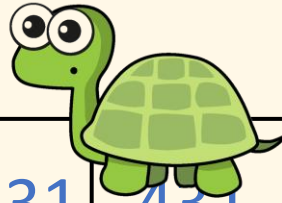

3,740	3,640	3,540	3,440	3,340	3,240	3,140	3,040
-------	-------	-------	-------	-------	-------	-------	-------

2,562	2,462	2,362	2,262	2,162	2,062	1,962	1,862
-------	-------	-------	-------	-------	-------	-------	-------

1,000 less

Do you agree with Tiny?

7,431	6,431	5,431	4,431	3,431	2,431	1,431	431
-------	-------	-------	-------	-------	-------	-------	-----

To be able to make and identify patterns in numbers.

Let's Learn:

6,135

7,135

8,135

9,135

10,135

What's stayed the same?

The hundreds, tens and ones digits

What's changed?

The thousands digits

It is 1 thousand greater each time

To be able to make and identify patterns in numbers.

Let's Learn:

1,618

1,718

1,818

1,918

2,018

What's stayed the same?

To be able to make and identify patterns in numbers.

Let's Learn:

This sequence is counting up in 10,000s.

To be able to make and identify patterns in numbers.

## Let's Have a go:

1 20,417 is shown in the place value chart.

TTh	Th	H	T	O
●●		●● ●●	●	●● ●● ●● ●

What is 100 more than 20,417?

What is 10 less than 20,417?

What is 1,000 less than 20,417?

2 Complete the number tracks.

663	673		693		713	
-----	-----	--	-----	--	-----	--

7,200		7,000			
-------	--	-------	--	--	--

### Key Questions:

How can you use a place value chart to find 10/100/1,000 ... more/less than a given number?

How can you use a Gattegno chart to find 10/100/1,000 ... more/less than a given number?

How many digits of the number will change if you add 10/100/1,000 ... to the given number?

To be able to make and identify patterns in numbers.

In

Practice:

- a) 27 57  
The numbers are increasing by 10
- b) 159 129 119  
The numbers are decreasing by 10
- c) 575 775 975 1,075  
The numbers are increasing by 100

1 Complete the number sequences and describe what is happening.

a) 

7	17		37	47		67
---	----	--	----	----	--	----

b) 

169		149	139			109
-----	--	-----	-----	--	--	-----

c) 

475		675		875		
-----	--	-----	--	-----	--	--

Number	10 more	100 more	1,000 more	10,000 more	100,000 more
25	35	125	1,025	10,025	100,025
250	260	350	1,250	10,250	100,250
2,500	2,510	2,600	3,500	12,500	102,500
25,000	25,010	25,100	26,000	35,000	125,000
250,000	250,010	250,100	251,000	260,000	350,000

Talk about it with a partner.

- 3 Count up in 1,000s starting from 6,240  
Count up in 10,000s starting from 6,240  
Count up in 100,000s starting from 6,240

4 Correct the mistake in each number sequence.

7,875 , 
 8,875 , 
 9,875 , 
 11,875 , 
 12,875 , 
 13,875

864,664 , 
 764,664 , 
 664,664 , 
 554,664 , 
 444,664

To be able to make and identify patterns in numbers.

If you finish:

Jack

I am counting up  
in tens from 184  
I will include 224

I am counting up  
in hundreds from 604  
I will include 1,040

Whitney

Teddy

I am counting up  
in thousands from 13  
I will include 13,000

Are the children correct?

Explain how you know.

Jack is correct.

Whitney is  
incorrect. All her  
numbers will end  
in 04

Teddy is incorrect.  
All his numbers will  
end in 13

# Arithmetic questions

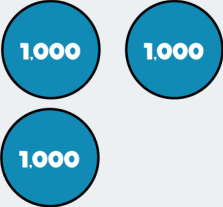

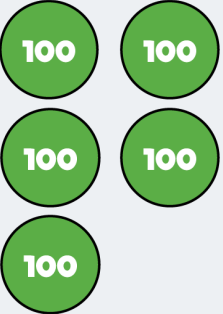

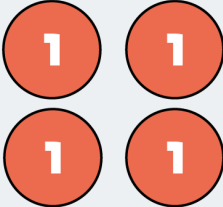

ANSWERS	
Subtraction with Formal Written Methods	Back to Basics
1.) 2,087	5.) 2,131
2.) 3,693	6.) 45,017
3.) 4,919	7.) 7,374
4.) 1,680	8.) 2,211

Year 5 | Autumn term | Block 1 – Place value | Step 8

T-Partition numbers to 1,000,000

L-To be able to partition numbers to a million.

1) What number is represented? 3,524

Th	H	T	O
			

2) How many tens are there in 100? 10

How many tens are there in 200? 20

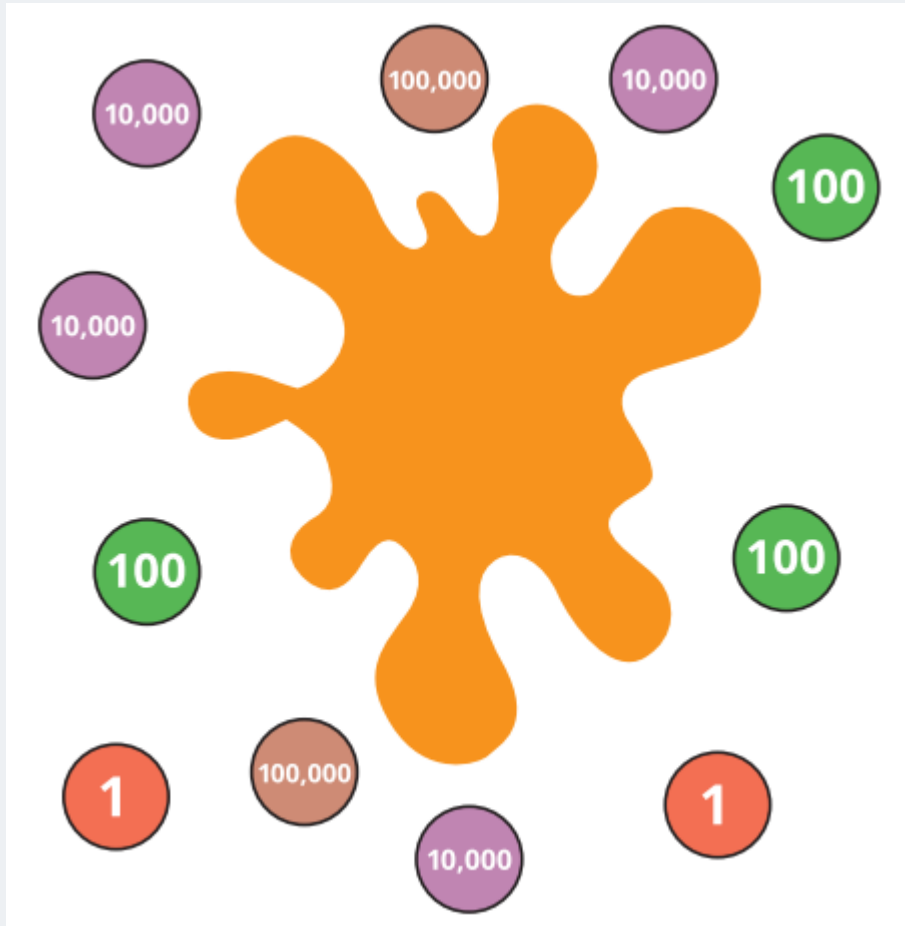

How many tens are there in 400? 40

How many tens are there in 420? 42

How many hundreds are there in 4,200? 42

L-To be able to partition numbers to a million.

Hook:

Key Questions:

Mrs Jennings says the total value of the counters is 265,312

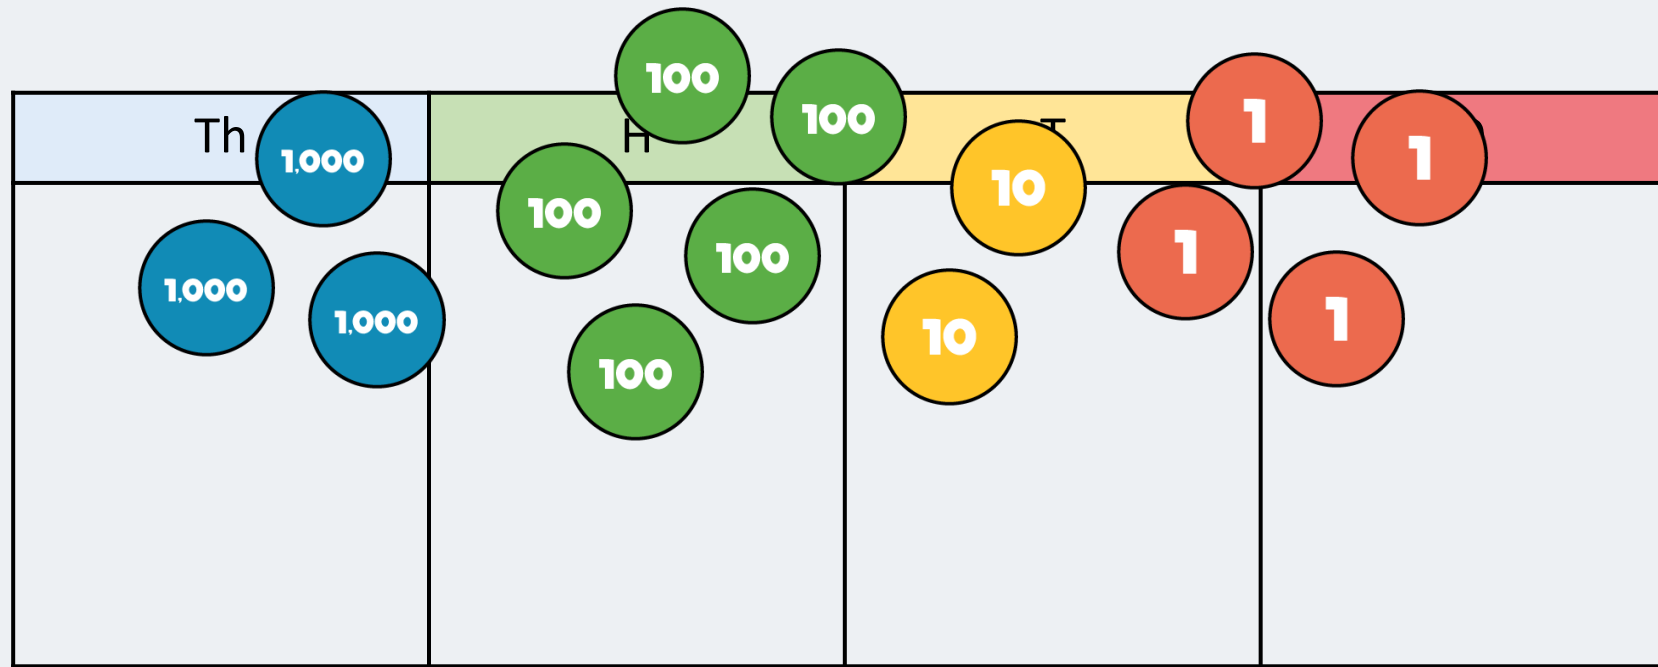

What place value counters could be hidden?

Mr Kenny says that there is a hundred thousand counter under the splat. Is he correct? How do you know?

Can you find more than one solution?

L-To be able to partition numbers to a million.

Let's Learn:

3,524 is equal to 3 thousands, 5 hundreds, 2 tens and 4 ones.

L-To be able to partition numbers to a million.

Let's Learn:

HTh	TTh	Th	H	T	O
	● ●	●		● ● ● ● ● ● ● ●	● ● ● ● ● ● ● ● ●

21,067 is equal to 2 ten-thousands, 1 thousand,  
0 hundreds, 6 tens and 7 ones.

$$21,067 = \underline{20,000} + \underline{1,000} + \underline{60} + \underline{7}$$

L-To be able to partition numbers to a million.

Let's Learn:

620,913

HTh	TTh	Th	H	T	O

What is the value of the first digit? 600,000

What is the value the digit 9? 900

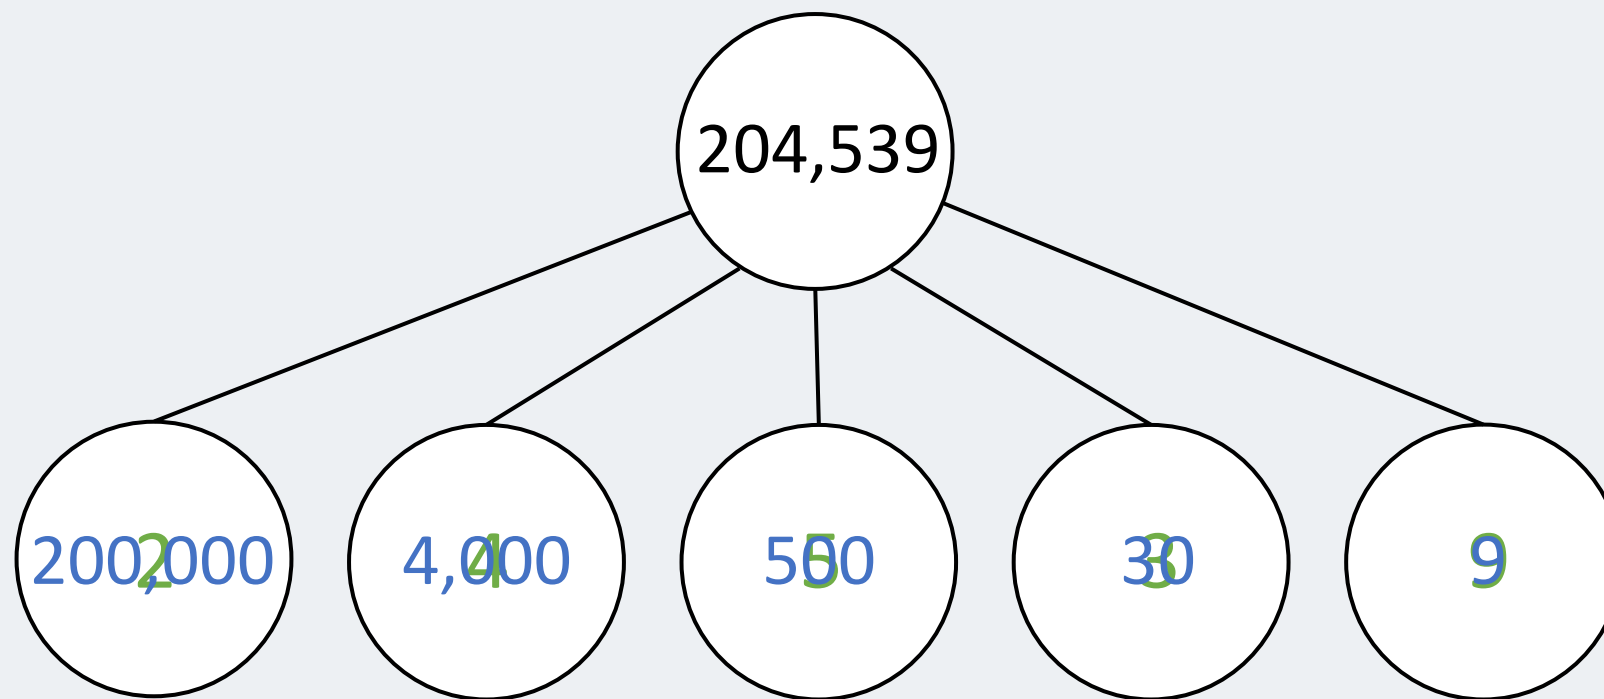

What is the value of the third digit? 0

L-To be able to partition numbers to a million.

Let's Learn:

Complete the part-whole model.

Do you agree with Tiny?

No, Tiny has not considered the place value of each digit.

L-To be able to partition numbers to a million.

Let's Have a Go:

1

Partition the numbers into thousands, hundreds, tens and ones.

▶  $6,789 = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}$

▶  $4,813 = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}$

2

Complete the number sentences.

▶  $\underline{\quad} = 20,000 + 7,000 + 800 + 40 + 3$

▶  $560,830 = \underline{\quad} + 60,000 + \underline{\quad} + 30$

*What number is being represented?*

*How can place value cards be used to help partition a number?*

*If you have 10 hundreds/thousands/ten-thousands, what can these be exchanged for?*

# L-To be able to partition numbers to a million.

## Independent Practice:

1 Complete the number sentence to partition the number.

$$231,465 = 200,000 + \boxed{\phantom{00000}} + \boxed{\phantom{00000}} + \boxed{\phantom{00000}} + \boxed{\phantom{00000}} + \boxed{\phantom{00000}}$$

2 Complete the number sentence to partition the number.

HTh	TTh	Th	H	T	O
●●	●●●●		●●	●	●●
●	●●●				
	●				

$$231,465 = 200,000 + 30,000 + 1,000 + 400 + 60 + 5$$

1

2

$$300,000 + 50,000 + 200 + 10 + 2 = 350,212$$

3 Partition each number into its parts.

The first one has been done for you.

a)  $32,607 = 30,000 + 2,000 + 600 + 7$

a)  $32,607 = 30,000 + 2,000 + 600 + 7$

b)  $2,915 = 2,000 + 900 + 10 + 5$

c)  $30,316 = 30,000 + 300 + 10 + 6$

d)  $438,390 = 400,000 + 30,000 + 8,000 + 300 + 90$

e)  $769,688 = 700,000 + 60,000 + 9,000 + 600 + 80 + 8$

e)  $769,688 = \underline{\hspace{10em}}$

4 Complete the number sentences.

a)  $125,684 = 100,000 + 20,000 + 4,000 + \boxed{\phantom{000}} + 84$

b)  $125,684 = 110,000 + \boxed{\phantom{00000}} + 600 + \boxed{\phantom{000}}$

a)  $125,684 = 100,000 + 20,000 + 4,000 + 1,600 + 84$

b) multiple possible answers, e.g.  
 $125,684 = 115,000 + 10,000 + 600 + 84$

c) multiple possible answers, e.g.  
 $597,203 = 203 + 400,000 + 190,000 + 7,000$

L-To be able to partition numbers to a million.

If you finish:

Esther is partitioning a number written in Roman numerals.

$$\text{MMDXL} = \text{M} + \text{M} + \text{D} + \text{X} + \text{X} + \text{X} + \text{X}$$

Is Esther correct?

Find some other ways of partitioning the number using Roman numerals.

Esther is correct.

---

multiple possible answers, e.g.

$\text{MM} + \text{CD} + \text{C} + \text{XL}$

$\text{M} + \text{D} + \text{D} + \text{D} + \text{XL}$

# Arithmetic questions

ANSWERS	
Subtraction with Formal Written Methods	Back to Basics
1.) 1,331	5.) 1,443
2.) 20,795	6.) 16,494
3.) 1548.0	7.) 11,953
4.) 16.1	8.) 2,212

Year 5 | Autumn term | Block 1 – Place value | Step 9

*T- Number line to 1,000,000*

*L-To be able to locate numbers on a number line.*

1) Complete the number tracks.

100	200	300	400	500	600	700	800
-----	-----	-----	-----	-----	-----	-----	-----

3,000	4,000	5,000	6,000	7,000	8,000	9,000	10,000
-------	-------	-------	-------	-------	-------	-------	--------

44,000	44,200	44,400	44,600	44,800	45,000	45,200	45,400
--------	--------	--------	--------	--------	--------	--------	--------

$$2) 100,000 \div 10 = 10,000$$

$$3) 10,000 \div 2 = 5,000$$

$$4) 10,000 \div 4 = 2,500$$

L-To be able to locate numbers on a number line.

Hook:

The midpoint between 400,000  
and 500,000 is 400,500

Do you agree with this statement? Explain your reason.

What are the values at the start and the end of the number line?

Mr Kenny says it is important to work out how many intervals there are. How does this help?

Mr Smith says that he thinks the midway point is 450,000. Is he correct? Why/why not?

L-To be able to locate numbers on a number line.

Let's Learn:

**What is an interval?**

There are 10 intervals on this number line.

L-To be able to locate numbers on a number line.

Let's Learn:

The difference in value between the start and end point is 100

There are 10 intervals.  $100 \div 10 = 10$

The number line is counting up in 10s

---

L-To be able to locate numbers on a number line.

Let's Learn:

The difference in value between the start and end point is 1,000

There are 10 intervals.

The number line is counting up in 100s  $1,000 \div 10 = 100$

## L-To be able to locate numbers on a number line.

Let's Learn:

The difference in value between the start and end point is 100,000

There are 10 intervals.

$$100,000 \div 10 = 10,000$$

The number line is counting up in 10,000s

---

## L-To be able to locate numbers on a number line.

### Let's Learn:

The difference in value between the start and end point is 1,000,000  $1,000,000 \div 10 = 100,000$

There are 10 intervals.

The number line is counting up in 100,000s

L-To be able to locate numbers on a number line.

Let's Learn: What number is the arrow pointing to?

The difference in value between the start and end point is 10,000

There are 10 intervals.

$$10,000 \div 10 = 1,000$$

The number line is counting up in 1,000s

L-To be able to locate numbers on a number line.

Let's Learn: What number is the arrow pointing to?

The midpoint between 0 and 1,000 is 500

$$1,000 \div 2 = 500$$

The midpoint between 6,000 and 7,000 is 6,500

# L-To be able to locate numbers on a number line.

## Let's Have a Go:

What numbers are the arrows pointing to?

Label the start and end points on the number line.

Draw arrows on the number line to show:

- the exact position of 60,000
- the approximate position of 35,000
- the approximate position of 82,369

What is the same about the number lines? What is different?

# L-To be able to locate numbers on a number line.

## Independent Practice:

1 What numbers are the arrows pointing to?

2 What numbers are the arrows pointing to?

a)

b)

1

a) 30,000 50,000 90,000  
b) 300,000 500,000 900,000

2

a) 30,000 65,000  
b) 100,000 950,000

See print  
out for  
extra  
questions

L-To be able to locate numbers on a number line.

If you finish:

Estimate the number that each arrow is pointing to.

a)

A =  B =  C =

b)

D =  E =  F =

multiple possible answers, e.g.  
a) A = 35,000    B = 89,000    C = 5,000  
b) D = 400,000    E = 900,000    F = 150,000

# Arithmetic questions

ANSWERS	
Multiplication Written Methods	Back to Basics
1.) 678	5.) 114
2.) 4,335	6.) 1,635
3.) 11,820	7.) 9,417
4.) 19,425	8.) 4,345

Year 5 | Autumn term | Block 1 – Place value | Step 10

T- Compare and order numbers to  
100,000

L-To be able to compare and order numbers using  
place value

1)  $300 + 4 + 10,000 = 10,304$

2)  $C = 100$

$I = 1$

$X = 10$

$V = 5$

3) What does ascending mean? Increasing in size

4) What does descending mean? Decreasing in size

L-To be able to compare numbers using place value.

## Hook

The class is playing a number game.

's card

's card

Each student draws a digit card from his or her stack and decides its place value. These cannot be changed. Students continue to draw cards until each player has a 6-digit number. The player with the greater number wins.

Key Questions:

What is the easiest way to compare the numbers?

Mr Kenny says that it is easiest to compare numbers by looking at the ones. Is this true?

Can you come up with a rule that helps you compare numbers?

What does greater than mean?

What does less than mean?

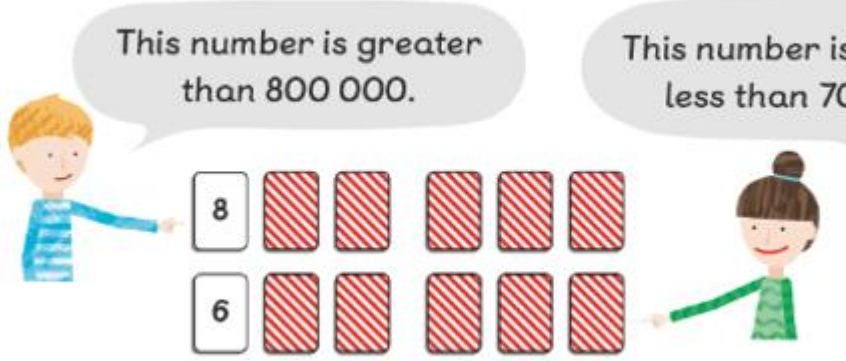

To be able to compare numbers using place value.

## Let's Learn:

1 Compare 8 3 5 1 2 7 and 6 1 4 5 2 3 .

This number is greater than 800 000.

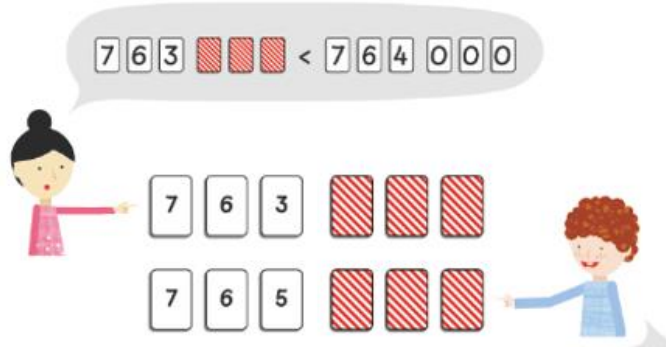

This number is definitely less than 700 000.

835 127 is greater than 614 523.

2 Compare 7 6 3 5 2 1 and 7 6 5 4 2 0 .

$763 \text{ } < \text{ } 764000$

763 521 is less than 765 420.

Can we tell which number is greater by looking at the digits in the ten thousands place and thousands place?

### Key Questions:

In order to compare numbers, what do we need to know?

Why do the children compare the first digit only?

Will this work every time?

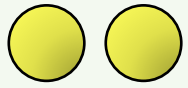

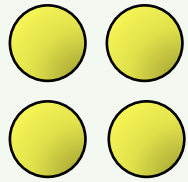

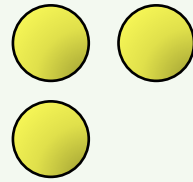

What do we need to do to if the columns have the same digits?

To be able to compare numbers using place value.

Let's Learn:

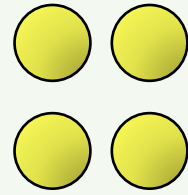

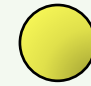

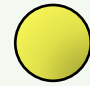

Dexter's  
number  
24,013

TTh	Th	H	T	O
				
2	4	0	1	3

$$24,013 < 40,101$$

Dora's  
number  
40,101

TTh	Th	H	T	O
				
4	0	1	0	1

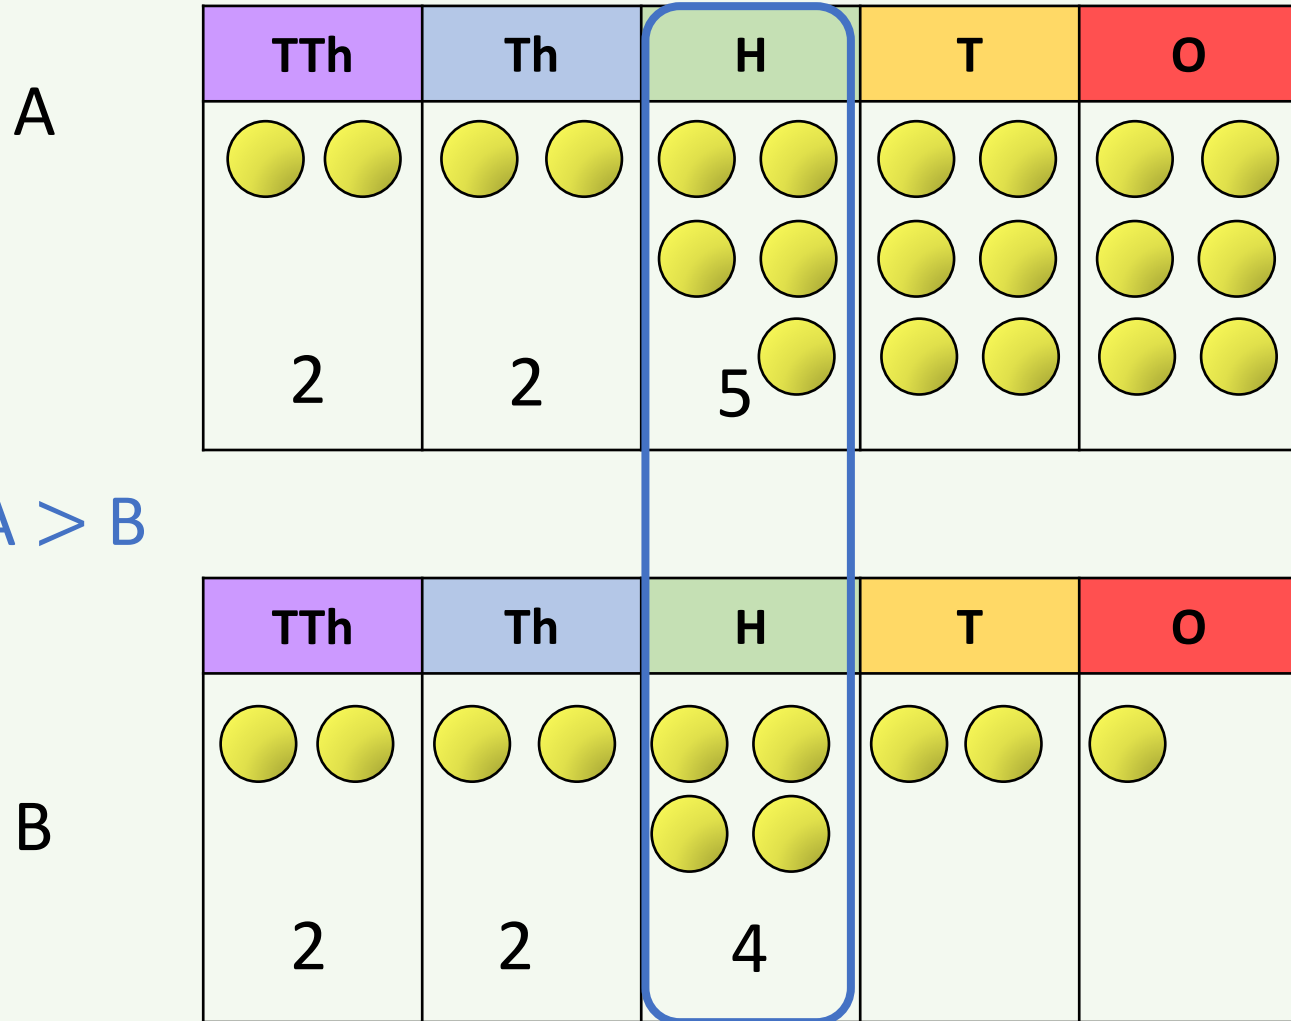

Dexter's number is greater! He has used 10 counters whereas Dora has only used 6

To be able to compare numbers using place value.

Let's Learn:

To be able to compare numbers using place value.

Let's Learn:

A) 7,996

TTh	Th	H	T	O
0	● ● ● ● ● ● ●	● ● ● ● ● ● ● ● ●	● ● ● ● ● ● ● ● ●	● ● ● ● ● ●

B) 21,253

TTh	Th	H	T	O
● ●	●	● ●	● ● ● ● ●	● ● ●

$A < B$

2

To be able to compare numbers using place value.

Let's Learn:

Order the numbers, starting with the smallest.

~~5,109~~   ~~99~~   11,022   ~~513~~   ~~5,122~~

99   513   5,109   5,122   11,022

To be able to compare numbers using place value.

## Let's Have a go:

1 Who made a greater number?

 7 8 5 3 1 2

 8 0 6 4 2 1

is greater than .  
 is less than .

Which number is already greater than 800 000?

2 Who made a smaller number?

 8 9 7 5 2 0

 8 9 5 1 0 3

is greater than .  
 is less than .

8 9 7     
or  
8 9 5    ?

## Key Questions:

Which number is already greater than 800 000?

Is a 6 digit number always greater than a five digit number?

3

Some ink spilt on the sheets of paper. All the numbers are 6-digit numbers. Is it possible to tell which number is greater?

495 52    
510 95

42 750  
 99 125

2  10  
1  39

475 04    
475 04

To be able to compare numbers using place value.

## Independent Practice:

1 Rosie and Jack have each made a number.

Rosie's number

Jack's number

- Who has made the greater number? How do you know?
- Draw counters on a place value chart to show a number that is greater than both Rosie's and Jack's.

2 Use 5 counters to make four different numbers on a place value chart

- Write your numbers.
- Write your numbers in order from smallest to greatest.

3 Circle the greater number in each pair.

- |           |       |           |        |
|-----------|-------|-----------|--------|
| a) 10,000 | 1,000 | d) 5,400  | 4,500  |
| b) 2,300  | 3,200 | e) 56,000 | 6,500  |
| c) 34,975 | 9,345 | f) 9,999  | 99,999 |

4 Write the numbers in order starting with the smallest.

- 9,000    908    972    99    90,000
- 700    72    576    907    27

Question	Answer
1	a) Jack They have the same number of ten thousands, but Jack has more thousands. b) Any number that is greater than 85,428
2	a) four numbers each with digit total of 5 b) numbers from part a) written in order from smallest to greatest
3	a) 10,000 b) 3,200 c) 34,975 d) 5,400 e) 56,000 f) 99,999
4	a) 99    908    972    9,000    90,000 b) 27    72    576    700    907

To be able to compare numbers using place value.

If you finish:

Place the digits cards 0 to 9 face down and select five of them.

Make the greatest number possible and the smallest number possible.

How do you know which is the greatest or smallest?

Dependent on numbers chosen.  
e.g. 4, 9, 1, 3, 2

Smallest: 12,349  
Greatest: 94,321

I know this is the greatest number because the digit cards with the larger numbers are in the place value columns with the greater values.

# Arithmetic questions

ANSWERS	
Multiplication Written Methods	Back to Basics
1.) 6,144	5.) 744
2.) 19,788	6.) 26,180
3.) 39,582	7.) 2,065
4.) 6,462	8.) 981

Year 5 | Autumn term | Block 1 – Place value | Step 11

*T- Compare and order numbers to  
1,000,000*

*L-To be able to compare numbers using place value.*

1) What digit is in the ten-thousands place in 703,562?

0

2) 6,834

6,934

7,034

7,134

3) Match the symbols to the correct meanings.

4) 1,003  $\textcircled{>}$  978

## To be able to compare numbers using place value.

### Hook

Can you use all 16 digit cards to make three numbers greater than 10 000 but less than 1 000 000?

Arrange them from the smallest to the greatest.

7	2	8	0
0	3	3	3
2	6	1	6
6	5	0	2

### Key Questions:

Mr Kenny says the best way to solve this problem is to make sure the numbers are greater than 100 000. Is this possible?

What are the three largest numbers that are possible with the given digits?

What are the three smallest numbers that are possible with the given digits?

To be able to compare numbers using place value.

## Let's Learn:

### Key Questions:

What rule can you use to compare numbers?

What symbol is used to show greater than?

What symbol is used to represent less than?

What rule can you use to help remember the symbol's direction?

What does the word ascending mean?

What does the word descending mean?

1  makes the following numbers.

1	8	2	3	0	0	182 300
2	3	6	7	0		23 670
2	3	6	6	5		23 665

182 300 is the greatest.

23 665 is less than 23 670.

$23\ 665 < 23\ 670 < 182\ 300$

 makes the following numbers.

6	2	0	1	3	3	620 133
2	6	0	8	7	5	260 875

Does this work?

The greatest number that can be made using the remaining cards is:

6	3	2	0
---	---	---	---

It is less than 10 000.

260 875 < 620 133 because

2  < 6 

To be able to compare numbers using place value.

Let's Learn:

Complete the number sentences using the correct inequality sign.

One hundred  
thousand and one  
100,001

64,032

07,489

74,890

477,380

477,308

To be able to compare numbers using place value.

Let's Learn: Use the number line to help write the numbers in descending order.

The difference in value between the start and end point is  $1,000 \div 10 = 100$   
45,985 45,913 45,510 45,109 45,006

There are 10 intervals.

The number line is counting up in 100s

To be able to compare numbers using place value.

## Let's Learn:

Order the numbers, starting with the greatest.

<del>45,109</del>	<del>4,923</del>	<del>45,910</del>	<del>49,006</del>	<del>45,915</del>
<u>49,006</u>	<u>45,915</u>	<u>45,910</u>	<u>45,109</u>	<u>4,923</u>

### Key Questions:

What is the most efficient strategy you can use?

To be able to compare numbers using place value.

## Maths Activity:

### Key Questions:

Can we use 19 cards to make three numbers?

What if we used fewer than 15 cards?

What symbol can you use to compare?

Activi  
Time

Work in pairs.

What you need:

Follow the instructions to make numbers using digit cards. The numbers you make must be greater than 10 000 but less than 1 000 000.

- Use 15 cards to make 3 numbers. Arrange them from the smallest to the greatest.
- Use 16 cards to make 3 numbers. Arrange them from the smallest to the greatest.
- Use 17 cards to make 3 numbers. Arrange them from the smallest to the greatest.
- Use 18 cards to make 3 numbers. Arrange them from the smallest to the greatest.

Can we use 19 cards to make the 3 numbers?

What if we use fewer than 15 cards?

To be able to compare numbers using place value.

If you finish:

Use the digit cards to make three different 5-digit numbers that match the clues.

- The digit in the ones column and the digit in the hundreds column have a difference of 2
- The digit in the hundreds column and the digit in the ten-thousands column have a difference of 2
- The sum of all the digits in the number is 19

Write your numbers in ascending order.

multiple possible answers, e.g.

*T- Round to the nearest 10, 100 or 1,000*

*L-To round to the nearest 10, 100 or 1,000*

L- To Round to the nearest 10, 100 or 1,000.

## Hook

How can you sort the eggs?

Key Questions:

What do the numbers have in common?

Could you place the numbers on a number line?  
How does that help?

My friend says that he would put 495 in the 500 nest as 495 is closest to 500. What does he mean by that?

What is this process called?

When is                      numbers useful?

How else could you sort the eggs?

L-To round to the nearest 10, 100 or 1,000

Let's Learn: Round 62 to the nearest 10

The previous multiple of 10 is 60

The next multiple of 10 is 70

62 is closer to 60 than 70

62 rounded to the nearest 10 is 60

L-To round to the nearest 10, 100 or 1,000

Let's Learn: Round 62 to the nearest 100

The previous multiple of 100 is 0

The next multiple of 100 is 100

62 is closer to 100 than 0

62 rounded to the nearest 100 is 100

*L-To round to the nearest 10, 100 or 1,000*

Let's Learn: Round 2,755 to the nearest 10      2,760

The previous multiple of 10 is 2,750

The next multiple of 10 is 2,760

2,755 rounded to the nearest 10 is 2,760

*L-To round to the nearest 10, 100 or 1,000*

Let's Learn: Round 2,755 to the nearest 10      2,760

Round 2,755 to the nearest 100      2,800

L-To round to the nearest 10, 100 or 1,000

Let's Learn: Round 2,755 to the nearest 1,000 3,000

The previous multiple of 1,000 is 2,000

The next multiple of 1,000 is 3,000

2,755 is closer to 3,000 than 2,000

2,755 rounded to the nearest 1,000 is 3,000

L-To round to the nearest 10, 100 or 1,000

Let's Learn: Round 502 to the nearest 1,000    1,000

You cannot round a 3-digit number to the nearest thousand.

Round 388 to the nearest 1,000    0

L- To Round any number to the nearest 10, 100 or 1,000.

## Let's Learn:

7 6 4

Find the place value,

↓

2 4 8

0:11 / 1:35

### Key Questions:

Which place value column do we need to look at when we round to the nearest 100?

My friend says that it is always best to round to the nearest 10. Do you agree?

Can you explain why?

Do we get the same answer when rounding a number to the nearest 10 and 100?

<https://www.youtube.com/watch?v=3afU6JQG15I>

L- To Round to the nearest 10, 100 or 1,000.

Let's have a go:

a) Are these numbers closer to 120 or 130?

Use the number line to help you complete the sentences.

121 is closer to  than

124 is closer to  than

127 is closer to  than

125 is the same distance from  as it is from

b) Round each number to the nearest 10

121

124

127

125

Key Questions:  
What is the same  
what is different  
about rounding  
to the nearest 10  
and nearest 100?

Why do numbers  
up to 49 round  
down to the  
nearest 100?

Can the answer  
be 0 when  
rounding?

L- To Round to the nearest 10, 100 or 1,000.

## Independent Practice:

Here is a number line.

- a) Which numbers round to 40?
- b) Which numbers round to 50?

Round each number to the nearest 10

- a) 41            d) 79            g) 33
- b) 19            e) 9             h) 71
- c) 25            f) 4             i) 99

Complete the table.

Number	624	371	289	750	38
Rounded to the nearest 10					
Rounded to the nearest 100					

There are 400 children in a school, to the nearest 100

What is the least number of children in the school?

What is the greatest number of children in the school?

L- To Round any number to the nearest 10, 100 or 1,000.

## If you finish:

Using the digit cards 0 to 9, can you make whole numbers that fit the following rules? You can only use each digit once.

1. When rounded to the nearest 10, I round to 20
2. When rounded to the nearest 10, I round to 10
3. When rounded to the nearest 100, I round to 700

To 20, it could be  
15 to 24

To 10, it could be 5  
to 14

To 700, it could be  
650 to 749

Use each digit  
once: 5, 24, 679 or  
9, 17, 653 etc.

# Arithmetic questions

ANSWERS	
Multiplication Written Methods	Back to Basics
1.) 26,184	5.) 264
2.) 34,812	6.) 58,832
3.) 864	7.) 12,096
4.) 2,485	8.) 2,562

Year 5 | Autumn term | Block 1 – Place value | Step 13

*T- Round within 100,000*

*L-To round within 100,000*

1) Label the number line.

2) Estimate the position of 63,812 on the number line.

4) Round 7,443 to the nearest 1,000      7,000

## L- To round within 100,000

### Hook

Stadium	Capacity
Old Trafford in Manchester	75 731
Millenium Stadium in Cardiff	74 500
St James' Park in Newcastle upon Tyne	52 404
St Andrew's in Birmingham	30 009
Macron Stadium in Bolton	28 723
Ageas Bowl in Hampshire	25 000
Windsor Park in Belfast	20 000

How did the journalist arrive at the number 76 000?

### Key Questions:

Why do you think the journalist chose 76 000 when the capacity is only 75 731?

Is there a special way in which we can round numbers?

Can you use a number line?

Can you use a bar graph?

## L-To round within 100,000

### Let's Learn

- Round to nearest 10 → Ones column
- Round to nearest 100 → Tens column
- Round to nearest 1,000 → Hundreds column
- Round to nearest 10,000 → Thousands column

L-To round within 100,000

Let's Learn

Round 84,000 to the nearest 10,000 80,000

The previous multiple of 10,000 is 80,000

The next multiple of 10,000 is 90,000

84,000 is closer to 80,000 than 90,000

84,000 rounded to the nearest 10,000 is 80,000

L-To round within 100,000

Let's Learn

Round 65,124 to the nearest 10,000

70,000

The previous multiple of 10,000 is 60,000

The next multiple of 10,000 is 70,000

65,124 is closer to 70,000 than 60,000

65,124 rounded to the nearest 10,000 is 70,000

\_\_\_\_\_

L-To round within 100,000

Round 84,000 to the nearest 10,000 80,000

Round 65,124 to the nearest 10,000 70,000

L-To round within 100,000

Let's Learn

Round 45,000 to the nearest 10,000

50,000

Round 42,989 to the nearest 10,000

40,000

Round 3,606 to the nearest 10,000

00,000

To round within 100,000

Let's Have a go:

Round 85,617

- To the nearest 10
- To the nearest 100
- To the nearest 1,000
- To the nearest 10,000

Key Questions:

Is there more than one solution?

Will the answers to the nearest 100 and 1,000 be the same or different for the different start numbers?

# To round within 100,000

## Independent Practice:

Round the distances to the nearest 1,000 miles.

Destination	Miles from Manchester airport	Miles to the nearest 1,000
New York	3,334	
Sydney	10,562	
Hong Kong	5,979	
New Zealand	11,550	

Complete the table.

Rounded to the nearest 100	Start Number	Rounded to the nearest 1,000
	15,999	
	28,632	
	55,555	

Mo rounds a number to the nearest 1,000

a) Write three numbers Mo could have started with.  
Use the number line to help you.

b) What is the smallest number Mo could have started with?

c) What is the greatest number Mo could have started with?

To round within 100,000

If you finish:

Round 59,996 to the nearest 1,000

Round 59,996 to the nearest 10,000

What do you notice about the answers?

Can you think of three more numbers where the same thing could happen?

Both numbers  
round to 60,000

Other examples:

19,721 to the  
nearest 1,000 and  
10,000

697 to the nearest  
10 and 100

22,982 to the  
nearest 100 and  
1,000

# Arithmetic questions

ANSWERS	
Multiplication Written Methods	Back to Basics
1.) 27,006	5.) 413
2.) 1,161	6.) 9,966
3.) 44,856	7.) 14,581
4.) 16,443	8.) 3,088

Year 5 | Autumn term | Block 1 – Place value | Step 14

*T- Round within 1,000,000*

*L-To round any number up to 1,000,000*

1) Label the number line.

2) Estimate the position of 619,000 on the number line.

3) 370,000   380,000   390,000   400,000   410,000

## L-To round any number up to 1,000,000

### Hook

My number is  
800,000 when rounded to  
the nearest 100,000

What is the greatest integer Amir could be thinking of?

What is the smallest integer Amir could be thinking of?

#### Key Questions:

What place value column should you look at to round the number to the nearest 100,000?

My friend says that the ones column digit must be zero. Is this true?

Mr friend says he would use a number line to solve this. How would that help?

To round any number up to 1,000,000.

Let's Learn:

Place 268,000 on the number lines.

To round any number up to 1,000,000.

Let's Learn:

My number is 500,000 when I round it to the nearest 100,000

What is the smallest number Tommy could be thinking of?

450,000

All the numbers on this number line round to 500,000 to the nearest 100,000

L-To round any number up to 1,000,000.

Let's Have a go:

To round any number up to 1,000,000.

## Independent Practice:

Round these populations to the nearest 100,000

City	Population	Rounded to the nearest 100,000
Leeds	720,492	
Durham	87,559	
Sheffield	512,827	
Birmingham	992,000	

Round 450,985 to the nearest

- 10
- 100
- 1,000
- 10,000
- 100,000

2 Round the numbers to the correct values.

a) **432,442**

to the nearest 10 is

to the nearest 100 is

to the nearest 1,000 is

to the nearest 10,000 is

to the nearest 100,000 is

b) **878,675**

to the nearest 10 is

to the nearest 100 is

to the nearest 1,000 is

to the nearest 10,000 is

to the nearest 100,000 is

3 Tiles are sold in boxes of 10

a) Teddy's uncle needs 84 tiles.

My uncle needs  
8 boxes because 84  
rounded to the nearest  
10 is 80

Explain why Teddy is wrong.

To round any number up to 1,000,000.

If you finish:

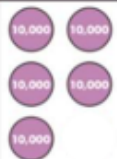

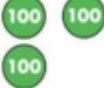

At a festival, 218,712 people attend across the weekend.  
Tickets come in batches of 100,000  
How many batches should the organisers buy?
